Executive Proposition: Full-Stack Software Engineer & Founder fusing **8 years of French Land Forces operational rigor** with high-performance software engineering (Python/FastAPI, TypeScript/React, PostgreSQL, Docker, Cloudflare). Specialist in building resilient, mission-critical systems and scalable digital platforms with a zero-incident, fault-tolerant mindset.

KEY PROFESSIONAL EXPERIENCE

Founder & Lead Full-Stack Architect — TechAndStream
2025 – Present

- Designed and deployed 3+ enterprise web applications (FastAPI, React, PostgreSQL) from discovery and architecture design to zero-downtime production.
- Built an automated Cloudflare & Docker CI/CD delivery pipeline, cutting production incident rates by **~60%** and optimizing cold starts.
- Engineered fintech integrations (Stripe, dynamic PDF billing, admin telemetry dashboards) adhering to strict DRY, SOLID, and OWASP security standards.
- Conducted comprehensive GDPR audits: pseudonymization, cryptographic hashing, and automated retention policies for EU/US clients.

Operational Specialist & Technical Logistics — Armée de Terre
2016 – 2024 (8 Years)

- **High-Reliability Operations:** Operated in 24/7 incident readiness under extreme pressure, applying crisis management and fault-tolerant discipline.
- **Complex Diagnostics:** Maintained high-value technical assets with zero tolerance for failure, enforcing rigorous preventive maintenance cycles.
- **Technical Pedagogy & Mentorship:** Trained and certified junior squads; translated structured debriefing into Agile code reviews and engineering leadership.

Supply Chain Associate — Vanheck Logistics
2025 (4 mos)

- Optimized physical warehouse workflows, routing, and inventory dispatching under tight SLA delivery deadlines.

Client Relations & Care Coordinator — Vitalliance
2025 (4 mos)

- Delivered high-adaptability personalized coordination, practicing active listening and multi-stakeholder crisis communication.
